

Lubricants are of systemic importance

Information sheet for entrepreneurs / managers, purchasers, heads of workshops and operations managers

Dear Business Partners

Your job is to keep your machines, your fleet as well as your company working. Our job is to support you in doing that. Benefit from our know-how, which has been built up purposefully since 1986.

We have not re-invented oils and lubricants, but we have developed technologies and concepts in order not to use them as much as possible, but only as much as absolutely necessary!

We have been perfecting application systems and products for 35 years with the aim of achieving oil-life-time-fillings for the machines.

For the sector of hydraulic oils we can even guarantee this, of course subject to certain conditions!

The technical and material components for this consist of:

- 1. Fully synthetic, readily biodegradable PANOLIN long-life oils*
- 2. KLEENOIL Microfiltration in the by-pass*
- 3. On-board oil analyses with integrated KLEENOIL ICC oil sensor*
- 4. Laboratory analyses dependent on requirements in an independent oil laboratory*
- 5. Observance of our application guidelines*

*In our view guaranteed means that we really guarantee everything we promise! This also concerns reducing your operational costs, enhancing the functional safety and the availability of the machines. As contemporary bonus we offer the free of charge **GREENMACHINE**® certification with indication of the CO₂-reduction. We are looking forward to hearing from you (please find our contact data below).*

Note: We neither have an analogue nor a digital answering machine and we will never answer your emails with a standard letter. We talk to you personally and advise you individually!

PS: Our products and concepts, often copied, never equalled.

We are the original with the power of many years of experience and innovation. Guaranteed!

Your KLEENOIL PANOLIN AG Team
